**Globalisation and Civilisation in International Relations:
Towards New Models of Human Interdependence
9-10 April 2010**

Friday 9 April: *Royal Irish Academy, 19 Dawson St.*
Saturday 10 April: *Humanities Institute of Ireland, UCD Belfield*

It is less possible than ever before to separate what goes on inside a state, and especially the distribution of power within a state, from what takes place between states, in particular their power relationships. Wherever one looks, one comes across the interdependence of intra-state and inter-state processes.
– Norbert Elias

Recent years have seen a convergence between the concerns of the disciplines of International Relations and Sociology: transitions from peace to war (and back); the dynamics of post-conflict social and political life, changing standards of acceptable behaviour between states; and rising levels of global interconnectedness.

In particular, an affinity has become evident between the 'English School' in International Relations and the theory of civilising and decivilising processes stemming from the thinking of Norbert Elias in Sociology. The affinity is especially manifest in the recent writings of Andrew Linklater, leading up to his three-volume study of *The Problem of Harm in World Politics* (Cambridge University Press, forthcoming) and in Stephen Mennell's *The American Civilizing Process* (Polity, 2007).

This conference brings together an international group of scholars in International Relations, Sociology and cognate disciplines to explore central issues concerning the possible emergence of a single global society.

Registration is free, but space is limited, so please register by sending your details to: globalisationandcivilisation@gmail.com by Thursday 1 April.
